The coordinates should be in your GPS database, with the exception of the "User" waypoints and perhaps the "Private" airport waypoints and/or the "Visual" waypoints. The coordinates for all waypoints are shown for reference. **User waypoints must be entered manually or downloaded accordingly.** Downloads are available for ForeFlight Mobile and for Garmin portable x96 units.

Magnetic course estimates vary between devices; discrepancies of several degrees may exist from those shown. Please ensure the accuracy of your entries by verifying the distance of each leg and the total distance for each route.
